PROFILE

With extensive experience as a Software Engineer, I am dedicated to developing visually compelling and highly responsive applications. My focus is on delivering meaningful value to end-users by prioritizing essential features. I am passionate about UI/UX design and take pride in crafting high-quality applications that provide an exceptional user experience.

WORK EXPERIENCE

CoinedOne Technologies, Kochi, India   07/2022 - PRESENT
Mobile Application Developer

- Led the team in developing and managing key features including localization, biometrics & PIN authentication, strapy, guided tour, notifications, deeplinking, geofencing, web sockets, location services, platform view, Network service discovery (NSD) using Kotlin as well as other features that improved the overall functionality and user experience of the mobile application.
- Implement state management solutions using BLoC patterns and Cubit.
- Integrate SDK such as UXCam, Mixpanel, Intercom, RevenueCat and Google AI.
- Created and managed PRDs as owner for multiple features.
- Managed deployment of applications to the App Store, Play Store And TestFlight while also reviewing and merging code contributions from teammates, ensuring high-quality app releases and efficient collaboration.

NDimensionZ Solutions Pvt Ltd, Kochi, India   04/2022 – 06/2022
Flutter Developer Intern

- Collaborate with UI/UX designers to translate wireframes and mockups, animated Flutter interfaces.
- Worked with Firebase integration and Firebase auth.
- Integrate RESTful APIs and JSON data handling.
